

Secondary Connectors

Compliance with standards

- ICAO: Aerodrome Design Manual 9157 Part 5
- FAA: AC150/5345-26 (L-823)

Features

- Connector are resistant to abrasive chemicals and all weather conditions.
- Connector kits cover all currently available airfield lighting cables.
- FAA L-823 style 5 Plug & style 12 Receptacle are used.
- Excellent watertightness.
- Quick on-site installation.

Application

Secondary Connectors are designed for a fast-and-easy watertight connection between the secondary cable and the series isolating transformer

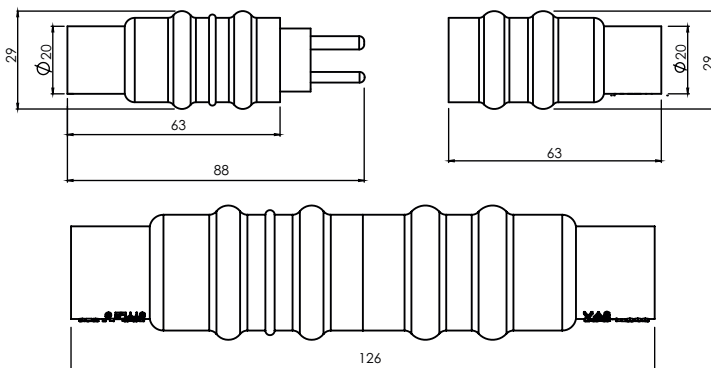

Performance

- Working Temperature between -55° to 65° Degree.

Electrical supply

- Upto 20A, 600V.
