

AIR TRAFFIC MANAGEMENT SYSTEM (ATMS)

Defence Helicopter Tracking & Management System

ATMS is a next-generation Air Traffic Management System designed for defence and para-military operations. It provides real-time tracking, monitoring and management of helicopters with full integration of transponders and flight plan lifecycle management ensuring operational excellence, safety and situational awareness.

SECURE

REAL-TIME

DEFENCE READY

RELIABLE

KEY FEATURES

Real-Time Helicopter Tracking

Track helicopters in real-time using Mode S / ADS-B transponders.

Transponder Integration

Compatible with Mode S / ADS-B transponders carried by pilots for seamless identification & tracking.

ATC Controller Workstations

Ergonomic controller interfaces with electronic strips, alerts & situational awareness tools.

Safety Nets & Alerts

Configurable safety nets with visual & audible alerts for enhanced safety.

SYSTEM ARCHITECTURE

Helicopter with Transponder

ATMS Server

ATC Controller Workstation

Secure Network • Encrypted Communication • Real-time Data Exchange • High Availability

TRANSPONDER INTEGRATION

- Mode S Transponders
- ADS-B Out
- 1090ES
- 8.33 kHz / 25 kHz Compatible

TECHNICAL SPECIFICATIONS

System Type	Air Traffic Management System
Tracking Technology	Mode S / ADS-B / Multi Sensor Fusion
User Capacity	Multiple Controllers (Scalable)
Platform	Windows / Linux Based
Database	PostgreSQL / SQL Server
Compliance	ICAO / DGCA / Local Regulations
Security	Role-based Access, Encrypted Communication, Audit Logs

APPLICATIONS

- Defence Helicopter Operations
- Border Surveillance Missions
- Search & Rescue Operations
- VIP / VVIP Movement Monitoring
- Disaster Relief Coordination
- Airspace Monitoring & Control
- Fleet Tracking & Mission Management

WHY CHOOSE (ATMS)?

- ✓ Real-time Situational Awareness
- ✓ Enhanced Safety & Mission Efficiency
- ✓ Integrated Transponder Solution
- ✓ Scalable & Modular Architecture
- ✓ Secure Defence Grade System
- ✓ Easy Integration with Existing Infrastructure
- ✓ Compliance with Global Standards

COMPLIANT WITH

ICAO
