

VAS-DTGM-LV2

VAS Distance To Go Marker Signboard

Applications

- The distance to go marker indicates the distance to the end of the active runway to the pilot..
- These signs are installed along one or both sides of the runway at 305 m distances to show pilots the distance remaining to the end of the runway.
- The sign above indicates that 610 m of runway is remaining.

Compliance with Standards

- ICAO, ANNEX -14 Part -1

Physical Characteristics

CONSTRUCTION MATERIAL USED:

- Aluminium Frame made of extruded profile.
- Aluminium sheet used at back side to be 2 mm thick.

PHYSICAL DIMENSIONS OF SIGNBOARD:

- Length 1200 mm
- Width 1200 mm

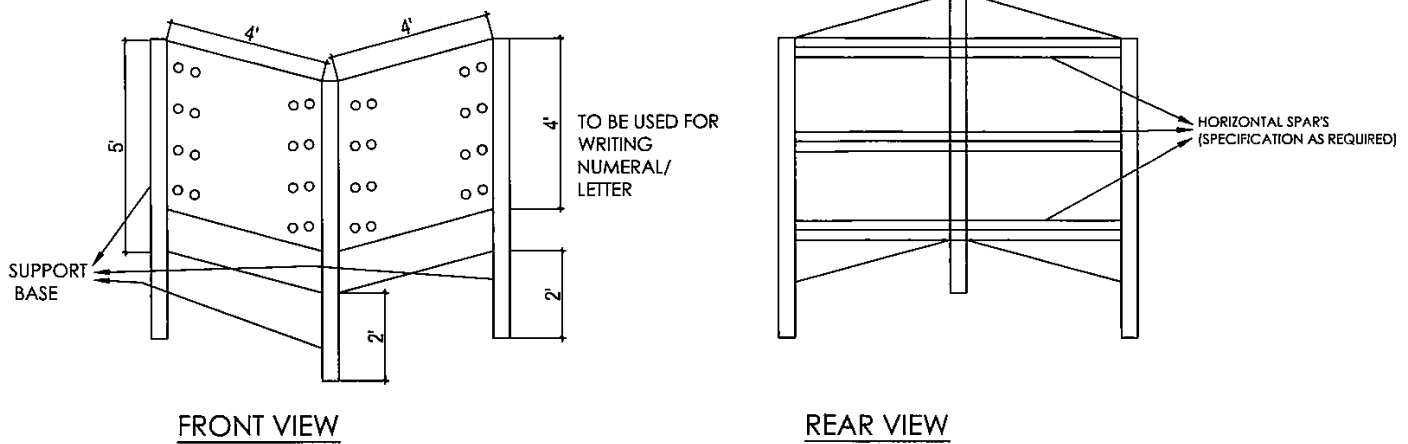

Optical Data

- 3M, HIP Retro reflective Red colour Letter.
- Black reflective sheet to be pasted on 2 mm Aluminium sheet.
- FRAME TO BE PAINTED/POWDER COATED IN AVIATION YELLOW.

Main Features

- Ability to withstand extreme weather conditions.
- Heavy rain fall, extreme heat or cold does not affect visibility beyond permissible limits.
- Easily breakable coupling enables it to break easily in case of any mishappening.
